Foreword

The publication of this 2017/2018 & 2018/2019 Annual School Census Reports has come at a time when the Education system in Nigeria is seeking solution to its persistent challenge of students' poor performance. Having current and reliable data in education is a necessary first step towards addressing the issue at hand because statistics show the true picture of a system through the relevant indicators. Through this, education managers are able to identify their challenges and address them accordingly.

The FCT 2017/2018 & 2018/2019 Annual School Census Statistical Reports is not the first report FCT Education Secretariat has generated. Over the years, some boards and departments under the Education Secretariat have been publishing their individual statistical yearbooks but not the School Census Report. In 2010, the Annual School Census of 2009/2010 was processed through the then FCT EMIS and the information generated was used for development of FCT Education Strategic and Operational Sector Plans.

This report is a practical demonstration of the FCT Administration's commitment to the vision 2030 and Mr President's Next Level Agenda. The world is going digital and all hands have to be on deck to ensure that education data is always made available for easy access and utilization in education management. It is no doubt a challenging task considering the fact that data gathering and reporting is a capital-intensive venture. But the challenge is not insurmountable given the plethora of stakeholders that education has who are all passionate about achieving the Sustainable Development Goals (SDGs) and Education for All (EFA) Goals.

While acknowledging the political will of the Honourable Minister of FCT, Mallam Muhammed Musa Bello in ensuring the availability of reliable education data, I wish to commend the Education Secretariat and its Department of Policy, Planning, Research and Statistics (DPPR&S) for conducting the production of this document. May I also invite development partners, Non-Governmental Organizations and the private sector to join hands with FCT Education Secretariat in enhancing our EMIS infrastructure and software in order to increase effectiveness and efficiency of education information generation in the FCT.

It is therefore with great joy and optimism that I present to you this FCT Education Secretariat's 2017/2018 & 2018/2019 Annual School Census Statistical Reports.

Sir Christian Chinyeaka Ohaa

Permanent Secretary

Federal Capital Territory Administration

Education Planning, Research and Statistics, FCT Education Secretariat

Acknowledgement

Our first appreciation goes to the Honourable Minister, Mallam Muhammed Musa Bello for providing the political will needed to carry out most education projects including the conduct of the 2017/2018 & 2018/2019 census exercise that is being reported upon. We also extend our thanks to the Honourable Minister of State Dr. Ramatu Tijjani Aliyu as well as Sir Christian Chinyeaka Ohaa, the Permanent Secretary FCTA for their support to the Honourable Minister in the discharge of his duties in the Territory.

This final output of the 2017/2018 & 2018/2019 Annual School Census, though by no means perfect had lots of rigorous activities like the training of data collectors, data collection, inputting, cleaning, processing and reporting which had gone into it. We therefore wish to mention that the entire process was very participatory as relevant staff of implementing Boards and Departments of the Education Secretariat and the Department of Policy, Planning, Research and Statistics (DPPR&S) imputed into it. The Zonal Education Officers for the seven zonal offices in the FCT were coordinators of the school census exercise.

The Education Secretariat wishes to express her eternal gratitude to the FCT Administration for its usual assistance to the projects of DPPR&S, and all the Heads of Boards and Departments for their contributions and support in making the publishing of this census statistical report possible. It is sincerely hoped that lessons learned from this experience will go into improving subsequent years' publications of school census data.

Dr. Mohammed Sani Ladan
Director DPPR&S
FCT Education Secretariat

Introduction

Education data is a veritable tool for any meaningful planning and delivery of education, globally and in Nigeria. Education produces the human capital that utilizes all other factors of production in order to yield desired result.

Nigeria accords high priority to education and this could be seen in the key position education occupies in National plans such as the National Economic Empowerment and Development Strategy (NEEDS), the vision 20-20, etc. FCT Administration considers education a top priority among the social services that enables development hence this laudable venture.

Given this undaunted role and status of education in the FCT and Nigeria at large, it becomes logical to say that no amount of intervention in education will be considered as too much, especially at this time when academic achievements of students in the country leave much to be desired. In order to get to the root cause of the present state of education in the country including FCT, there is need to turn full attention to planning of education. But you cannot plan without the needed data.

Education statistics therefore play very critical role in providing required information to all stakeholders for policy planning, monitoring and evaluation of education activities. One of these critical roles is the process of data gathering and dissemination.

This publication of 2017/2018 & 2018/2019 Census data reports is aimed at awakening the consciousness of all stakeholders to the continued need of Education statistics in provision of effective and efficient education services. It is also an affirmation of the positive impact made by the Honourable Minister for Education, Prof. Adamu Adamu in his effort at ensuring that Nigeria has up to date record in global publications such as the Annual School Census.

The FCT Administration under the proactive leadership of Mallam Muhammed Musa Bello has through the Secretary for Education provided the wherewithal for the conduct of 2017/2018 & 2018/2019 Annual School Census. UNESCO and UNICEF which are key International partners working with FCT to provide the needed support for publication of this census statistical analysis report.

In the quest to having a reliable, timely and accurate data, FCT Education Secretariat through the Department of Policy, Planning, Research and Statistics has launched FCT EMIS Server online. Data entry is now done online from FCT public and private schools.

This report covers both public and private schools in the FCT and provides education statistics on pupils' and students' enrolment, teachers' information and facilities in schools for all levels of education and education.

This publication is a very good step at showing that FCT has a functional Education Management Information System (EMIS). It is also an indicator that given the necessary support, FCT can expand this EMIS to a more robust one capable of competing with global best practice.

Interestingly, school information is now captured on a real time basis from the school to the EMIS data based on an ICT enabled educational network.

Executive Summary

The critical role of accurate and reliable education data in the formulation, implementation, monitoring and evaluation of education policy in Nigeria cannot be overemphasized. Education data help in making connections that lead to insights and improvements for the development of the education sector in Nigeria. The Agenda for Sustainable Development and Education 2030 present an ambitious new policy vision for the international education community. This vision places new demands on countries, especially producers and users of education data like Nigeria. For Sustainable Development Goal (SDG) 4, “inclusive and equitable quality education and lifelong learning opportunities for all,” the main challenge for countries is to measure and monitor targets that are characterized by their broad scope, the thematic focus on quality and equity, and the need to enhance national institutional and technical capacities. Based on this, the production and dissemination of high-quality education statistics is essential for effective planning, as well as for monitoring progress towards national and global education targets.

It is on this note that the FCT Education Secretariat took up the challenge to print and disseminate her 2017/2018 & 2018/2019 Academic years’ data as follow up to previous publications. Evidence from data shows, as in previous publication, that enrolment into FCT schools continues to increase at both the public and private sectors. Furthermore, private schools in the Territory continue to outnumber the public schools but enrolment into public schools remains higher. In FCT so many children study in limited number of public school facilities than required and by implication over stretching available infrastructural facilities and educational resources such as teachers, textbooks and others in those public schools.

This document is arranged in eight sections with each section displaying tables and graphs on the relevant school data from the Annual School Census data of 2017/2018 & 2018/2019 depending on the sub-title of the section. The data were collected using the Annual School Census Instrument, which is a uniform instrument for school data collection in Nigeria. Section five presents tables and graphs on basic education indicators of access, quality, equity and efficiency in the FCT education sector. These indicators are measures for assessing the state of education in every setting.

Definitions:

Access indicators:	They are indicators used to measure the percentage of school age children that could be registered into school at all levels, and could use school facilities.
Compulsory Education:	The number of years or age span during which children are legally obliged to attend school.
Dropout Rate by Grade:	Proportion of pupils from a cohort enrolled in a given grade at a given school year who are no longer enrolled in the following school year.
Education indicators:	They are measures of the outcomes of educational institutions, programs, and practices, where resulting statistics are intended to inform educational policy.
Gender Parity Index:	Ratio of female to male values of a given indicator.
Gross Enrolment Ratio:	Number of pupils or students enrolled in a given level of education, regardless of age, expressed as a percentage of the official school-age population corresponding to the same level of education. For the tertiary level, the population used is the 5-year age group starting from the official secondary school graduation age.
Indicator:	This is a quantitative or qualitative variable that provides a simple and reliable basis for assessing achievement, change or performance.
Net Enrolment Rate:	Total number of pupils or students in the theoretical age group for a given level of education enrolled in that level, expressed as a percentage of the total population in that age group.
Out-of-School Children-Primary:	Children in the official primary school age range who are not enrolled in either primary or secondary schools.
Percentage of Female Teachers:	The number of female teachers at a given level of education expressed as a percentage of the total number of teachers (male and female) at the same level in a given school year.
Percentage of Repeaters:	Total number of pupils who are enrolled in the same grade as the previous year, expressed as a percentage of total enrolment in the given grade of education.
Percentage of Trained Teachers:	Number of teachers who have received the minimum organized teacher training required for teaching at the specified level of education in the given country, expressed as a percentage of the total number of teachers at the same level of education.

Promotion Rate by Grade:	Proportion of pupils from a cohort enrolled in a given grade at a given school year who study in the next grade in the following school year.
Pupil-Teacher Ratio:	The average number of pupils per teacher at a given level of education, based on headcounts of both pupils and teachers.
Quality indicators:	They are statistical measures that give an indication of output quality. However, some quality indicators can also give an indication of process quality.
Repetition Rate by Grade:	Proportion of pupils from a cohort enrolled in a given grade at a given school year who study in the same grade in the following school year.
School-age Population:	Population of the age group theoretically corresponding to a given level of education as indicated by theoretical entrance age and duration.
School life expectancy:	The number of years a person of school entrance age can expect to spend within the specified level of education.
Transition Rate:	The number of pupils (or students) admitted to the first grade of a higher level of education in a given year, expressed as a percentage of the number of pupils (or students) enrolled in the final grade of the lower level of education in the previous year.
